 Portfolio

Profile

Motivated and dedicated Higher National Diploma in Information Technology (HNDIT) undergraduate with a passion for technology and innovation. Equipped with knowledge of software development, database management, web technologies, and information systems gained through academic learning and hands-on projects. A fast learner with strong analytical thinking, problem-solving, and teamwork skills, committed to continuous professional development. Seeking an opportunity to apply technical knowledge, gain practical industry experience, and contribute effectively to organizational success while building a rewarding career in the IT industry.

Education

Higher National Diploma in Information Technology - Current GPA 2.90	2024 - Present
Sri Lanka Institute of Advanced Technological Education Advanced Technological Institute - Tangalle	
G.C.E Advanced Level Technology Stream	2018-2021
Embilipitiya President College	

Projects

Garment Inventory Management System (Individual Project)

PHP | JavaScript | Visual Studio Code | CSS | HTML | GitHub | Free Hosting | MySQL | Chrome

- Developed a desktop-based bakery management system to streamline product management, inventory tracking, customer orders, and sales operations.
- Applied Object-Oriented Programming (OOP) principles in C# to build modular, reusable, and maintainable application components.
- Integrated MySQL and Microsoft Access for efficient data storage and management, while designing a user-friendly interface using Windows Forms in Visual Studio.

Bakery Management System (Group Project)

MySQL | Microsoft Access | C# | Visual Studio | Chrome

- Collaborated in developing a web-based bakery management system to streamline product and order management.
- Developed responsive web pages and integrated frontend with backend functionalities.
- Implemented CRUD operations for managing products, customers, and orders using PHP and MySQL.

Electricity Billing System (Individual Project)

Java | Java Swing | MySQL | Visual Studio Code | Chrome

- Developed a desktop-based electricity billing system using Java Swing to manage customer information, electricity consumption, and bill generation.
- Applied Object-Oriented Programming (OOP) principles to develop modular, reusable, and maintainable application components.
- Integrated MySQL for efficient storage and management of customer and billing records, while implementing a user-friendly graphical interface with Java Swing.

Season Ticket Management System (Individual Project)

C# | Visual Studio | Microsoft Access | Chrome

- Developed a desktop-based season ticket management system to manage customer and ticket records efficiently.
- Implemented features for ticket registration, updates, searching, and record management.
- Designed a user-friendly interface and integrated Microsoft Access for secure data storage.

Technical Skills

- Programming Languages - HTML, CSS, C, Java, PHP, JavaScript
- Databases - MySQL
- Version Control - GitHub
- Concepts -Object-Oriented Programming (OOP), Agile Development
- Frameworks and Tools -Visual Studio, Microsoft Office Package, Visual Studio code, Jira, Node.js, Figma, IntelliJ IDEA

Soft Skills

Problem-Solving Skills	Leadership & Initiative	Content writing
Strong Communication Skills	Quick Learning & Adaptability	Team Collaboration

Certifications

Python for Beginners (Ongoing) University of Moratuwa	Web Design for Beginners (Ongoing) University of Moratuwa	Computer Literacy Open University
Building Career Skills Technical Collage-Embilipitiya	Certification of Completion DP Education Coding School	AI Literacy (Ongoing)
